DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, and 36-38, drawn to a notification system, classified in class 705, subclass 26.
- II. Claims 24-35, drawn to a method, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a method which does not require the components of invention I. See MPEP § 806.05(d).

SPECIES

This application contains claims directed to the following patentably distinct species of the claimed invention:

In the event Applicants elect Group I above, they are further obligated to elect among the following species as follows:

species of claim 2,

Art Unit: 3625

species of claim 3,
species of claims 4-9,
species of claims 10-12, 22, and 38
species of claim 13,
species of claim 14,
species of claims 15-19,
species of claim 20,
species of claim 23.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 21, 36, and 37 are generic.

In the event Applicants elect Group II above, they are further obligated to elect among the following species as follows:

species of claim 25,
species of claims 26-29,
species of claim 30,
species of claims 31-35.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 24 is generic.

Art Unit: 3625

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
